EXPERIENCE

03/01/2016 - Director, Scientific and Clinical Affairs, REMITIGATE LLC
Delmar, New York 12054

07/1982 – present: Samuel Stratton Dept. of Veterans Affairs Medical Center
113 Holland Avenue Albany, New York 12208

- 6/1/2016-present: WOC (without compensation) volunteer in same capacity as listed below
- 4/2012-present: Director, PGY2 Pharmacy Pain Residency
- 6/1994-present: Clinical Pharmacy Specialist, Pain Management
- 7/2002-10/2003: Clinical Pharmacy Specialist, Primary Care & Pain Mgmt
- 3/1987-6/1994: Clinical Pharmacy Specialist, Research/Oncology/Hematology
- 7/1982-3/1987: Staff Pharmacist

Current Activities Focus: The Clinical Pharmacy Specialist (CPS) works in close collaboration with medical staff members in the management of various acute and chronic pain disease states. After a diagnosis/diagnoses has/have been made and is/are documented in the electronic medical record, a specific request may be made by a physician or mid-level for the CPS to monitor a disease state(s) or assess a medication regimen and adjust, initiate, or discontinue therapy for individual patients. The CPS may also order and interpret lab tests necessary to monitor and support drug therapy upon such a request.

Specific Patient Care Activities Include:

- Conduct comprehensive appraisals of patients' health status by taking health and drug histories. Relevant findings must be documented in the patient's medical record.
- Evaluate drug therapy through direct patient care involvement, with clinical assessment and objective findings relating to patient's responses to drug therapy and communicating and documenting those findings and recommendations to appropriate individuals and in appropriate records (i.e., patient's medical record).
- Develop and document therapeutic plans utilizing the most effective, least toxic, and most economical medication treatments.
- Provide patient and health care professional education.
- Order, perform, review, and analyze appropriate laboratory tests and other diagnostic studies necessary to monitor and support the patient's drug therapy.
- Prescribe medications, devices, and supplies to include, but not limited to: initiation, continuation, discontinuation, monitoring and altering therapy, based upon established protocols.

- Perform the physical measurements necessary to ensure the patients appropriate clinical responses to drug therapy.
- Assist in the management of medical emergencies, adverse drug reactions, and acute and chronic disease states.
- Identify and take specific corrective action for drug-induced problems. Order consults (i.e., Anesthesia interventionalists, imaging, dietician, social work, psychology), as appropriate, to maximize positive drug therapy outcomes.

Activities have previously and/or currently include:

- Development of PGY2 Pharmacy Pain Residency
- Develop and incorporate telemedicine options for remote VA patients
- Monthly inservices to primary care providers on various pain topics.
- Pharmacokinetic screening and serum analysis of opioid therapy
- Development and implementation of Stratton VA Pain Clinic
- Ambulatory Care Chronic Pain Clinic
- Participate in daily pain management inpatient rounds to monitor and review pain management regimens on those patients referred to our service for chronic or acute pain management and/or PCA
- Pain Management Multidisciplinary Team Member
- Pain Management Multidisciplinary Team Chair
- Director, Pharmaceutical Care Pain Clinic
- Write Drug Utilization Review (DUR) and guidelines
- Coordinate and ran weekly Pharmaceutical Care Neurosurgery Pain Management Clinic. Activities
- Include patient evaluation, counseling, physical assessment, prescription writing and patient follow-up.
- Design, conduct and participate in drug studies, audits and evaluations concerning the utilization review of analgesic and antineoplastic drugs under the auspices of Therapeutic Agents and Pharmacy Review Committee, Quality Assurance and Research and Development Committee.
- Instrumental in the development of a Multidisciplinary Pain Management Team. This included development of policies and procedures in conjunction with other health professionals, patient rounds, pain evaluation, and the management of pain with a multidisciplinary team. In addition, all referrals for Patient Controlled Analgesic (PCA) ambulatory infusion pumps had been coordinated, monitored, and followed up by the Oncology Pharmacist.
- Member of the VAMC VISN Eastern Regional Pain Task Force.
- Initiated, developed, and supervised the Oncology Satellite. This included establishing a multidisciplinary team and writing initial policies for safe handling of cytotoxic drugs within the VA Hospital. We were the first hospital in the northeastern New York State to establish such policies, and our policies were used as a model for pharmacies throughout New York State.
- Evaluate drug literature by analysis of experimental design and conclusions, in order to compare and contrast therapeutic regimens and uses for new drug therapies.
- Designed antineoplastic drug dosage regimens utilizing pharmacokinetic principles and specific patient parameters, when requested by the attending physician.
- Provided drug information to various health care providers on all investigational drugs

being utilized in the Medical Center and ensured availability of current drug information in Pharmacy, Medical and Nursing Services. Responsibilities included meeting with various investigative sponsors, writing and editing protocols, educating pharmacy, nursing and medical staff, and procuring, preparing, and dispensing medication.

- Prepared bulletins, newsletters and policy memos to inform physicians, nurses, pharmacists and other staff on the appropriate utilization of medications.
- Served as a consultant to the Therapeutic Agents and Pharmacy Reviews Committee on the selection of antineoplastic drugs for formulary listing.
- Attended Tumor Board meetings on a regular basis and aided in the selection of appropriate antineoplastic drug therapy.
- Developed and co-coordinated the high tech Homecare department at the V.A.
- Coordinated Pharmacy Grand Rounds, educational seminars for pharmacy, medical, and nursing staff.

Committees Have or Currently Include:

- **Speakers' Bureaus, Invited Lectures, and Webinars:** Provided on request
Dr. Fudin has given over 50 invited lectures throughout the United States over the last 12 months. These have included, but are not limited to physicians, pharmacists, nurses, pharmaceutical industry training, and managed care organizations. While most of these educational forums are face-to-face live, new technologies have allowed for numerous Webinar style learning opportunities. Major academic institutions have included many prestigious universities, on and off-campus forums, various medical practice clinics, dinner meetings, etc. A full list and evaluations (where available) can be provided on request.
- **(N)** August 12 & 13, 2013 - U.S. FDA's Center for Drug Evaluation and Research, the Clinical Trials Transformation Initiative (CTTI) Collaborative Workshop on the safety and long-term efficacy of extended-release and long-acting opioid analgesics. Washington, DC.
The purpose of this workshop is to engage multiple stakeholders in discussions around approaches to develop more evidence of the long-term safety and efficacy of extended-release and long-acting opioid analgesics for the treatment of chronic non-cancer pain. Participants include representatives from the FDA and several other federal agencies, clinical experts, epidemiologists, statisticians, patient advocates, and the pharmaceutical industry. PROMPT (Professionals for Rational Opioid Monitoring & Pharmacotherapy)

- August 2012: Founder/Chairman, PROMPT (Professionals for Rational Opioid Monitoring and Pharmacotherapeutics). This is a multidisciplinary group of clinicians, researchers and academicians from various fields. Some include areas of Addiction, Anesthesiology, Pain, Pharmacy, Primary Care, Psychiatry, Psychology, and various Board Certified specialties. PROMPT has serious concerns about the safety of chronic opioid use; we are therefore in favor of mitigating these risks with appropriate proactive and ongoing validated interventions intended for the benefit of patient care and public safety. We advocate for clinician education, proactive risk stratification, and appropriate therapeutic monitoring. See <http://paindr.com/prompt-info/>
